## **DETAILED ACTION**

### ***Oath/Declaration***

1. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either on an application data sheet or supplemental oath or declaration.

### ***Allowable Subject Matter***

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance:

Consider claims 1-8, the best prior art found during the examination of the present application, Grady (U.S. Publication No. 2004/0058649 A1), discloses a FM transmitter and charger assembly for a MP3 player, comprising a primary member having a first locating portion on a front thereof for supporting a MP3 player thereon (see figures 1,7, and 8);

the first locating portion having a connecting unit secured thereon for connection to a socket of a MP3 player when the MP3 player is located on the first locating portion (par. 0039);

the FM transmitting device being made so as to be capable of transmitting audio signals wirelessly, which are transferred thereto from a MP3 player connected to the connecting unit of the primary member, thus allowing a radio to receive the audio

signals, and play music accordingly after the radio is tuned to a same channel as the FM transmitting device (pars. 0040-0053).

However, Grady fails to disclose the first locating portion being formed with a fitting trench on a front side thereof; the primary member having a second locating portion on the front;

the second locating portion having a first power plug and an audio source plug secured thereon;

the connecting unit being electrically connected to the audio source plug; a securing member for holding a MP3 player therein as well as for securing the MP3 player to the first locating portion of the primary member; the securing member including: (1) a hollow holding part for the MP3 player to be closely inserted therein; (2) an engaging plate connected to a rear side of the hollow part and capable of being detachably fitted into the fitting trench of the primary member; a FM transmitting device detachably connected to the second locating portion of the primary member; the transmitting device having a power socket, and an audio source socket for connection to the first power plug, and the audio source plug of the primary member respectively; the FM transmitting device being made so as to be capable of transmitting audio signals wirelessly, which are transferred thereto from a MP3 player connected to the connecting unit of the primary member, thus allowing a radio to receive the audio signals, and play music accordingly after the radio is tuned to a same channel as the FM transmitting device; whereby a MP3 player can be secured to the primary member when the engaging plate of the securing member is fitted into the fitting trench of the primary

member after the MP3 player has been closely inserted in the hollow part of the securing member.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
